

# AKSHAY KUMAR SONER

## Software Developer

✉ akshay.soner@gmail.com    ☎ +91-8305271652    📍 Pune, Maharashtra

### SUMMARY

---

**AI Developer with strong expertise in Python, LLM frameworks, and ML workflows.** Experienced in building semantic engines, AI-driven document systems, and scalable FastAPI-based architectures. Skilled in Dockerized deployments, VPS/NGINX management, and production-ready AI pipelines. Focused on clean, efficient, and high-performance backend and AI solutions.

### WORK EXPERIENCE

---

**AI Developer, Kaycomm Services** 08/2025  
Pune

- Developed the **Semantic Engine** powering intelligent search, recommendations, and content understanding for UrbanPillar and CornerSpaces.
- Built an **AI-driven Workflow Website Builder** enabling automated page and content generation.
- Created **LLM Data Engine pipelines** for topics, blogs, and AI-generated images.
- Implemented **Vastu analysis** modules using floor plan interpretation and spatial reasoning.
- Developed core modules for the company's **HRMS system**.
- Managed full-stack **Docker + Portainer deployments**, CI/CD automation, and performance optimization.
- Handled **VPS, domains, SSL, reverse proxy**, and production infrastructure.

**Software Developer, The CodeWise** 06/2024 – 08/2025  
Pune (Onsite)

- Built **AI-powered document parsing and summarization tools** using LLMs, LangChain, and Weaviate.
- Integrated **lightweight GenAI pipelines** (Ollama + scraping) for domain enrichment and industry classification.
- Developed and deployed **scalable FastAPI backends** with async SQLAlchemy, JWT auth, file uploads, and external API integrations.
- Automated **large-scale data workflows** with Python for logging, error handling, and CSV/Excel operations.
- Dockerized full-stack applications with **Docker Compose**, secure configs, and network-bridged services.
- Managed VPS deployments using **Docker, NGINX, and Portainer** with CI/CD and complete domain/subdomain setups.
- Resolved **production authentication issues**, including cookie domain fixes, Google auth integration, and cross-subdomain session handling.

### EDUCATION

---

**Bachelor of Engineering,** 07/2012 – 06/2016  
Chhattisgarh Swami Vivekananda Technical University, Bhilai  
First Class Bhilai

## TECHNICAL SKILLS

---

### Languages

Python, SQL

### ML

Linear Regression, Logistic Regression, Random Forest

### Deployment & DevOps

CI-CD Pipeline - Docker, Portainer, NGINX, Github

### Others

Web Scraping (BS)

### Frameworks/Libraries

FastAPI, Pandas, NumPy, Scikit-learn Libraries, Langchain.

### Databases

MySQL, MongoDB, Weaviate Vector DB, PostgreSQL, FAISS Vector DB

### IDE Tools

VS Code, Jupyter, PyCharm, Anaconda

## ADDITIONAL INFORMATION

---

### Languages Known

English, Hindi

## KEY PROJECTS

---

### Elixir (Pharma Project)

- Automated pharma document generation using dynamic PDF templates for streamlined regulatory workflows.

### QueryMate

- LLM-powered document summarizer built with LangChain and vector search, enabling intelligent retrieval and concise summaries.

### LabsChecks

- Health-tech platform that helps users compare diagnostic tests, get recommendations, and book lab services across multiple cities.

### Oxtract

- AI system for parsing pension documents using multi-stage pipelines and semantic search to extract and organize key insights.

### CI/CD Automation

- Developed automated CI/CD pipelines using Docker Compose and NGINX to ensure smooth, reliable, and scalable production deployments.
